

**Little Shop of Physics
18th Annual Open House
Saturday, February 28, 2009
10:00-6:00
Lory Student Center
Colorado State University**

**Hands-On Science Fun
for All Ages!!!**

Bigger and Better than Ever!!!

Over 250 Hands-On Experiments!

This year's tour is "The Rainbow and Beyond." The rainbow is cool, but it's not enough... See how you look in infrared, how you look in ultraviolet. See which kind of light wins in The Battle of the Bulbs. Use invisible radiation to power the Infrared Insects. And explore the the science of the atmosphere in our new CMMAP area.

Take a break with our 7 interactive presentations. Watch us make ice cream in two minutes, make stuffed animals fly, and show you the world beyond the rainbow!
